

THE EMBOSSE

The **Emboss** is designed to emboss or deboss variable information such as lot or production codes, date codes, pricing and more directly on primary packaging materials. The unit is easily mounted on intermittent-motion cartoning lines to provide sharp imprints on pre-printed cartons for cosmetic, health and beauty aids, toys, ice cream novelties, frozen entrees, crackers, cookies and more.

The **Emboss** series includes the basic Model E, the Model H which features a heater and thermostat for use with products that require heat to emboss, and the Model HDE a heavy-duty machine that provides more pressure during the embossment process.

Hardened-steel Norwood embossing type provides crisp, legible imprints on cartoning and other semi-rigid materials.

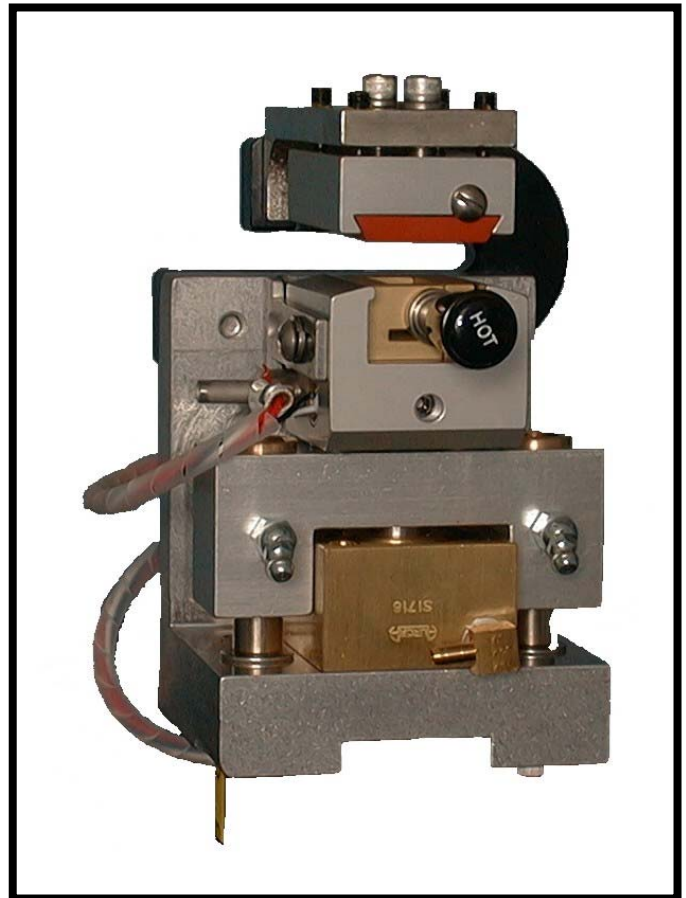

SPECIFICATIONS

MODELS E AND EH

Imprint Size:	3/4" X 1 1/4"
Metric:	19.mm x 31.75mm
Speed:	250 IPM
Dimensions; (W x H x D)	5" x 7 1/2" x 5"
Metric:	125 x 190.5 x 125mm
Weight:	10 Lbs.
Electric	110 V, 60 Hz.
Standard:*	(E -1A, EH - 2A)
Mounting:	Brackets for most packaging machinery
Actuation:	Air Cylinder
Timing:	Parent packaging machine
Type:	Special sharp-faced hardened steel type

E - Embosser
EH - Embosser with heater
