

Field Service Contract

Coding Products

Support Plan Feature Definitions

Preventative Maintenance

Two scheduled service visits per year, which includes labour and travel so there are no out-of-pocket expenses.

Technical Support

We will ensure telephone response by a technical specialist within a maximum of two hours of your call to us. With the Premium contract, response time is within one hour. Technical support is available during factory working hours.

Response Time

An Allen Coding technician will be on site within a defined time after the decision for a site visit is made.

Spare Parts Kits

To ensure maximum uptime, a minimum set of spare parts may be purchased at a discount.

Unscheduled Call-Outs

Depending on the type of contract, all costs for a repair visit may be covered, or you will receive a discounted labour and travel rate.

Training

Realise the maximum benefit from your system by using our experts to train your staff, or to assist in activities related to the installation or setup of your system. Depending on the contract, a technician will conduct one, full-day on-site training per year, or a brief update for operators and maintenance staff during the preventative maintenance visits.

Management Review/ Service History Report

Allen Coding specialists evaluate call activity, assess common problems and recommend proactive maintenance solutions to improve the availability of your coders. A detailed summary will be provided of reported problems, site visits, response times and resolutions.

Protect your process by choosing the plan to suit you.

Assisted Support Plan

If your maintenance crew is quite capable and the coders do not require specific, high-level expertise, then Assisted Support is for you. We will provide technician training for solid knowledge transfer, technical phone support during work hours, discounts on spare parts and automatic software upgrades for non-feature addition versions. Assisted Support is for the maintenance department that has things well under control.

Preventative Plan

Why wait for a failure to put your business in a crisis situation? Keep your system up and running with a Preventative Maintenance Plan. It provides peace of mind through proactive, scheduled preventative maintenance visits performed by our factory-trained technicians and technical support during standard business hours. In addition, you receive discounts on spare parts and training.

Premium Plan

Do you need to maintain maximum uptime? The Premium Plan provides the quickest response time along with scheduled preventative maintenance visits, discounted spare parts, unlimited service visits and periodic reports on the status of your system. The Premium Plan provides the ultimate in support and its all-inclusive structure allows for simple administration and budgeting.
