

Rotary Typeholders

30 | 35 | 44

Allen™ has developed a range of high quality quick change rotary typeholders for use with the Compact and Super Compact Hot Foil Coders.

The requirements of the food industry have been met by a combined date/price unit whilst pharmaceutical and industrial users are accommodated with numerators which will print anything between 14 - 23 digits of variable information depending on coder.

The advantage of this system is the ease and speed with which codes can be accurately changed simply by flicking over rotary wheels.

Features

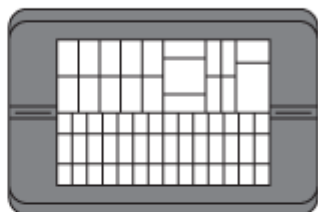

- Wheels can be engraved to customers' requirements
- Available in either date/price or numerator form
- Quick change positive locating wheels
- Design ensures perfect character alignment
- Hardened steel wheels-precision engraved
- Three styles - numbering, date price, double date price

Typeholders
